Employee Communications

Symon is focused on information communication, and solutions that collect, analyze, and optimize real-time productivity data. We deliver information to contact centers, and other enterprise applications.

Products include:

- Powerful middleware for consolidating enterprise-wide data

- Real-time and historical data displayed in browser-based dashboards and scorecards

- Improved productivity with operational messages and alerts to the desktop and other output options

- Wireless LED panels to address the persistent need for increased productivity and faster response times

- Workforce efficiency software for controlling contact center staffing costs

Symon products use the latest technology including web and wireless capability, bringing you both value and affordability. Our products help thousands of companies to understand their business in real-time and communicate important information for successful operation.

Find out how Symon can help you manage for success.
